

Chalet Silver, Verbier (5 bedrooms)

Built in 2007 in traditional timber style, no expense has been spared in making Silver one of the ultimate chalets available for rent in the Alps. It was designed by a renowned local architect to the highest standard and furnished with the finest attention to detail. Stag antlers above the natural stone fireplace and fur rugs scattered throughout hint at the owner's love of traditional alpine design. The rustic charm of this much loved chalet provides an incredibly warm and cosy haven to indulge and relax in.

Chalet Silver occupies the second floor of the building. A private lift takes guests directly into the chalet, opening onto an impressive open plan living and dining area. Large French

windows lead to the south facing balcony with a private hot tub. There is also a shared spa on the ground floor with sauna and Hamam (Turkish bath).

In the living area there is an impressive 52 inch plasma screen with surround sound, Sonos music system and Wi-Fi throughout the chalet. There are five beautifully decorated bedrooms, including the master bedroom with access to the wrap-around balcony, and a lovely bunk room sleeping four. In total Chalet Silver comfortably sleeps up to 12 guests.
